

# PROGRAM SUPPORT

## CRS Managed Repair Program AKA - Customer Property Overhaul

**CRS** has dedicated resources for managing your repair and overhaul requirements. With our Repair Control Group monitoring and managing the large volume of requirements on an ongoing basis, CRS has the experience to support your needs. As an AS9120 and ISO:9001 accredited facility, CRS has a select group of approved vendors performing at the highest quality standards available. With special service and care, your repair/overhaul requirements are handled in the manner you would expect. Our services provide customers with detailed reporting including evaluations, tear-down, and findings, along with dispatch reliability to guarantee you availability. CRS promotes our Repair Control Group as Customer advocates who watch out for the needs of every single transaction.
